SUMMARY

Final-year Computer Science undergraduate specializing in AI and ML, with hands-on experience building GenAI and Agentic AI systems. Skilled in LLM orchestration, RAG pipelines, and multi-agent workflows using LangChain, LangGraph, and FastAPI. Seeking an AI Engineer role focused on Generative AI and Agentic AI product development.

EDUCATION

VIT Bhopal University <i>B.Tech in Computer Science, Specialization in AI and ML — CGPA: 8.3/10</i>	Sept 2022 – May 2026
Adarsh Public School <i>Class XII – 82%</i>	April 2021 – May 2022

SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS
Frameworks and Tools: LangChain, LangGraph, Agno, FastAPI, Hugging Face, FAISS, Streamlit
AI and ML: Large Language Models, RAG Pipelines, Prompt Engineering, Multi-Agent Orchestration, LLM Fine-Tuning, MCP
Developer Tools: Git, GitHub, Visual Studio Code

EXPERIENCE

Technology and AI Intern <i>EwandzDigital</i>	Jan 2026 – Mar 2026 <i>Hybrid</i>
- Built and deployed 3+ LLM-powered backend workflows using FastAPI and Python, optimizing prompt-chaining pipelines for production LLM applications. - Integrated LangChain-based LLM modules into scalable, API-driven microservice architectures serving real-world traffic. - Conducted system integration testing and debugging for agentic AI pipelines, improving reliability across LLM endpoints.	

PROJECTS

Abstractly AI – Research Paper Generator <i>Python, FastAPI, LangChain, LangGraph, FAISS</i>
- Engineered an end-to-end agentic LLM platform that auto-generates structured research papers using multi-step LangGraph workflows. - Built a Retrieval-Augmented Generation (RAG) pipeline with FAISS vector store for context-aware, citation-grounded outputs. - Designed agent tool integrations following MCP (Model Context Protocol) principles for standardised, interoperable AI-tool communication.
AI Instructional Design Automation System <i>Python, Agno, LLMs, Prompt Engineering</i>
- Built a multi-agent LLM pipeline using Agno to automate generation of course outlines, quizzes, and instructional content at scale. - Engineered chain-of-thought prompt workflows improving coherence and consistency; modular backend supports plug-and-play LLM swapping.
AI Mock Interview System <i>Python, FastAPI, LLMs, React, TypeScript, face-api.js</i>
- Engineered an LLM-powered interview agent that dynamically generates personalised questions by parsing candidate resumes and extracting skills using OpenAI and Groq APIs. - Built a multimodal AI pipeline combining LLM-driven question generation with real-time facial expression analysis for confidence scoring and performance reporting.

CERTIFICATIONS

- Applied Machine Learning in Python** – Coursera (University of Michigan)
- Data Science using Python** – iamneo
- Introduction to Generative AI** – SimpliLearn

EXTRA CURRICULAR ACTIVITIES

Industrial Training <i>Preprod Corp, TVS and BSNL</i>	September 2024
Engaged in a 2-week industrial training program at Preprod Corp, BSNL, and TVS, gaining actionable knowledge and skills from industry experts in Chennai and Bangalore.
